Department for Transport

High Speed Two (HS2) Limited has been tasked by the Department for Transport (DfT) with managing the delivery of a new national high speed rail network. It is a non-departmental public body wholly owned by the DfT.

MA05: Risley to Bamfurlong

Additional data used in the air quality assessment

1 Introduction

1.1.1 This report presents additional data used in the air quality assessment of the Risley to Bamfurlong area (MA05) and comprises:

- relevant policies and guidance; and
- baseline air quality data;

1.1.2 Volume 5, Appendix AQ-001-0MA05¹ should be referred to for details of the air quality impact assessment.

¹ High Speed Two Ltd (2022), High Speed Rail (Crewe – Manchester), *Environmental Statement, Air quality report*, Appendix AQ-001-0MA05. Available online at: <https://www.gov.uk/government/collections/hs2-phase-2b-crewe-manchester-environmental-statement>.

Background Information and Data

Air quality

BID AQ-002-0MA05

MA05: Risley to Bamfurlong

Additional data used in the air quality assessment

2 Relevant policies and guidance

- 2.1.1 The Risley to Bamfurlong area lies within the administrative areas of Warrington Borough Council (WBC), St Helens Borough Council (SHBC) and Wigan Metropolitan Borough Council (WMBC).

2.2 Warrington Borough Council

- 2.2.1 The WBC Local Plan Core Strategy² is the overarching strategic policy document in the council's local planning framework. It sets out the planning framework for guiding the location and level of development in the borough until 2027.
- 2.2.2 Policy CS 4 for transport states that the council will support improvements in Warrington's transport network that reduce the impact on traffic on air quality and reduce carbon emissions to help tackle climate change. In addition to Policy CS 4, the Core Strategy Policy QE 6 – Environment and Amenity Protection, states:
- 'the Council, in consultation with other Agencies, will only support development which would not lead to an adverse impact on the environment or amenity of future occupiers or those currently occupying adjoining or nearby properties, or does not have an unacceptable impact on the surrounding area. The Council will take into consideration the following: [...]
 - air quality; [...] Proposals may be required to submit detailed assessments in relation to any of the above criteria to the Council for approval; and
 - where development is permitted which may have an impact on such considerations, the Council will consider the use of conditions or planning obligations to ensure any appropriate mitigation or compensatory measures are secured...'
- 2.2.3 The WBC Local Plan Core Strategy is currently under review and a new local plan³ is being developed for Warrington. It sets out the planning framework for guiding the location and level of development in the borough until 2037.
- 2.2.4 Policy ENV8 on Environmental and Amenity Protection builds on policy QE6 of the adopted plan with the following considerations on air quality:

² Warrington Borough Council (2014), *Adopted Local Plan Core Strategy*. Available online at: <https://www.warrington.gov.uk/adopted-local-plan-2014>.

³ Warrington Borough Council (2019), *Warrington Proposed Submission Version Local Plan 2017 – 2037*. Available online at: https://www.warrington.gov.uk/sites/default/files/2019-09/proposed_submission_version_local_plan_v4.pdf.

Background Information and Data

Air quality

BID AQ-002-0MA05

MA05: Risley to Bamfurlong

Additional data used in the air quality assessment

- '3. the Council will seek to ensure that proposals for new development will not have an unacceptable negative impact on air quality and will not further exacerbate air quality in the Council's designated Air Quality Management Areas (AQMAs); or will contribute to air pollution in areas which may result in further areas being designated.
- 4. new development that would result in increased traffic flows on the M62 past Manchester Mosses Special Area of Conservation (SAC) of more than 1000 vehicles per day or 200 heavy goods vehicles (HGV) per day must be accompanied by evidence identifying whether the resultant impacts on air quality would cause a significant effect on ecological interests within the SAC. Where such effects are identified they would need to be considered in accordance with Policy DC4.'

2.3 St Helens Borough Council

2.3.1 The SHBC Core Strategy⁴ is the principal document in a framework of planning policy documents known as the St Helens Local Plan. It provides an overall strategy of how much development is required, where development should be located and how this will be delivered for the period until 2027. The Core Strategy Policy CP 1 - Ensuring Quality Development in St. Helens, states:

- '[...] All proposals for development within the Borough will be expected, where appropriate, to meet the following standards as a minimum: [...]
- 3. Environmental quality;
 - i. Minimise and mitigate against the effects of air, light and water pollution (including contamination of soil, surface water and ground water resources) and noise, vibration, smells, dust and electromagnetic fields caused by the development; and
 - ii. Development that is located within or would impact on Air Quality Management Areas will require special consideration with regards to their impacts on air quality.'

2.4 Wigan Metropolitan Borough Council

2.4.1 The WMBC Core Strategy⁵ is the strategic local plan for the borough. It sets out the spatial vision through to 2026 and a range of strategic objectives and policies. The Core Strategy Objective NRP 1 states:

⁴ Knowsley Council (2012), *Local Development Framework Core Strategy (LDF43E)*. Available online at: [http://www.knowsley.gov.uk/pdf/LC21_StHelensLocalPlanCoreStrategy\[1\].pdf](http://www.knowsley.gov.uk/pdf/LC21_StHelensLocalPlanCoreStrategy[1].pdf).

⁵ Wigan Council (2013), *Local Plan. Core Strategy: Development Plan Document*. Available online at: <https://www.wigan.gov.uk/Docs/PDF/Council/Strategies-Plans-and-Policies/Planning/Adopted-Core-Strategy.pdf>.

Background Information and Data

Air quality

BID AQ-002-0MA05

MA05: Risley to Bamfurlong

Additional data used in the air quality assessment

- 'To maintain soil quality; tackle pollution and ground stability problems from contaminated and derelict land and ensure that no new pollution arises as a result of development; ensure that development does not result in unacceptable levels of air pollution or will not have an unacceptable effect on air quality, through traffic or emissions [...]'.
2.4.2 Policy CP 17 - Environmental Protection, states:

- 'We will help maintain, enhance and protect our environment for the benefit of people and wildlife, and make the borough a better place for people to live and businesses to locate and thrive, by: [...]
- 4. Managing air quality, particularly in our Air Quality Management Areas, including by minimising the air pollution (and carbon dioxide emissions) likely to arise from new development.'

MA05: Risley to Bamfurlong

Additional data used in the air quality assessment

4 Construction traffic data

- 4.1.1 Table 7 and Table 8 outline the predicted flows for construction traffic on the highway network. The data presented are split into annual average daily traffic (AADT) (Table 7) and heavy duty vehicles (HDV) (Table 8) in the 'without the Proposed Scheme' and 'with the Proposed Scheme' scenarios.
- 4.1.2 The air quality assessment of construction traffic emissions has used traffic data based on an estimate of the average daily flows in the peak year during the construction period (2025 – 2037). The assessment assumes vehicle emission rates and background pollutant concentrations from year 2025 as a worst case.
- 4.1.3 Table 6 outlines the predicted flows of construction traffic on the site haul routes. The data are presented for the 'with the Proposed Scheme' scenario only split in HGV and articulated dump trucks (ADT).

Table 7: Traffic data (AADT) used for the construction assessment

5 Operational traffic data

- 5.1.1 Table 10 outlines the predicted flows of traffic on the highway network relating to the operation of the Proposed Scheme in 2038. The data presented is split into AADT and HDV in the 'without the Proposed Scheme' and 'with the Proposed Scheme' scenarios, together with the change between the two scenarios. It also notes whether the road will be closed, diverted or realigned permanently, due to the operation of the Proposed Scheme.
