1 Introduction

- 1.1.1 This report presents the community open space condition surveys undertaken within the Broomedge to Glazebrook community area (MA04).
- 1.1.2 Condition surveys were undertaken on publicly accessible open spaces likely to be directly impacted by the HS2 Phase 2b Proposed Scheme.
- 1.1.3 The purpose of the open space surveys was to collect primary data on the condition of open spaces. The information collected was used to identify the nature of the resource, the type of facilities and their available condition. In addition, it was used to identify the sensitivity of the space and their users to determine potential impacts associated with construction or operation of the Proposed Scheme.
- 1.1.4 These condition surveys were used to inform the community assessment reported in Volumes 2 and 5 and the Equality Impact Assessment (EQIA).
